26—30 小题:阅读下列短文,从 A、B、C 三个选项中选出一个正确答案,并在答题纸上写出所选的字母符号。

The AIDS virus has been around for a very long time, but the spread of the disease within the last twenty years or so on such a scale has caused real concern. It seems that in the 1980s the principal carriers of the disease were homosexuals, drug users and prostitutes. Now it is becoming evident that heterosexuals also spread the disease, that children can be born with the virus and that patients in hospitals are being infected too.

Just as the WHO fought the spread of children's disease throughout the world in the 1960s, so now they must again use education to fight this killer disease. The organization proposes to write newspaper articles and books, and to make videos and TV programmes. These will be translated into the major languages of the world so that as many people as possible can be educated about the danger of AIDS.

However, we are still faced with two big questions. Is educating the public enough if we are to control the spread of AIDS? Does the WHO have enough money and resources for hospitals throughout the world to help and care for sufferers? One fact is becoming clearer and that is that the WHO has not focused enough on the need to educate medical staff. There are still hospitals and health centers in some parts of the world which do not accept AIDS patients, while there are others where too little care is taken to prevent the spread of the disease.

26. Which of the following statements is true according to the passage?
- A. AIDS is a disease for which a cure has been found.
 - B. AIDS is a disease which has just been found.
 - C. AIDS is a disease which has existed for a long time.
27. Who is easily infected with AIDS?
- A. People who use drugs.
 - B. People who visit prostitutes.
 - C. both of the above.
28. In WHO's opinion, what will help most effectively in fighting against the spread of AIDS?
- A. More education.
 - B. More medicines.
 - C. More doctors.
29. From the passage, we can see that the writer is not happy about _____ .
- A. the education the general public get on AIDS
 - B. the education the medical staff get on AIDS
 - C. the TV programmes on AIDS
30. Which of the following statements is NOT true according to the passage?
- A. It is not enough only to educate the general public.
 - B. There are some hospitals in some parts of the world which do not accept AIDS patients.
 - C. Great care has been taken to prevent the spread of AIDS everywhere in the world now.
